

## EcoBreeze Air Purifier - How to replace the filter

Replacing your air purifier's filter is important for both air quality and the lifespan of the air purifier itself. Follow these easy instructions to replace your filter like a pro:

1. Prepare the new filter by removing it from its packaging and placing it on a clean surface.
2. Power down and unplug your air purifier from power.
3. Locate the tabs on each side of the air purifier. Pull gently to separate the front panel from the rest of the unit (Fig. 1).
4. Pull gently on the blue ribbon located at the top of the filter. This action releases the filter from the unit (Fig. 2).
5. Place the used filter inside the new filter's packaging.
6. Fit the new filter inside the unit. Ensure the paper side is facing outward and the ribbon is not caught in the housing.
7. Carefully line up the tabs on each side of the panel with the corresponding holes on the unit (Fig. 3). Once aligned, push gently on the panel to secure it to the unit.
8. Plug in your air purifier and press the *POWER* button. Hold the *FILTER* button for 3 seconds to reset the filter service indicator light.
9. Mail your used filter to us using the prepaid shipping label. We recycle the plastic frame in every used filter, free of charge.
